Course Description

This 1 day instructor-led course provides a high level overview of Hitachi Content Intelligence concepts, architecture and features. You will also be introduced to Hitachi Content Monitor which is a Content Intelligence-based application that monitors Hitachi Content Platform performance in near real time.

After reviewing critical concepts and features, you will get hands-on practice exploring the Hitachi Content Intelligence management console and creating Workflows.

Course Objectives

Upon completion of this course, you should be able to:

- Explain Hitachi Content Intelligence functionality and concepts
- Describe common use cases
- Describe the steps to create a Content Intelligence Workflow
- Define key terms of Hitachi Content Intelligence
 - Documents
 - Workflows
 - Data Connections
 - Pipelines
 - Indexes
 - Hitachi Content Search Console
- Describe Content Intelligence infrastructure, system requirements and architecture
- Describe the features of Hitachi Content Monitor
